IS YOUR HOME RODENT-FREE?

Keeping your home rodent free is a challenging task. Rats and mice are disturbing mostly because they pose a major threat to the health of the family. Rats and mice carry fleas, lice, mites among others and can transmit many vicious diseases. That is why it is very important that a house be completely rodent free in order to be safe and healthy.

“First and foremost, it is important that our house is clean and well maintained”, said Peachy Tiu, Product Manager of Klerat, the only single feed rodenticide in the market. “Rodents are attracted to garbage and poor sanitation as they can easily find food and shelter in such conditions. That is why the first requirement in keeping our home rodent free is keeping our home clean,” she added.

Using a quality and effective rodenticide will also help in eradicating rodents. Klerat rat and mice killer is the only single feed rodenticide in the market today that is proven in killing both rats and mice in one feeding. Unlike other brands of rodenticide which requires multiple feeding, Klerat contains second generation active

ingredient called Brodifacoum that is proven in killing rats and mice with less bait.

Klerat is also economical to use as it only requires less bait. Only 3 grams of Klerat is needed for a 250-gram rat to be killed, while other rodenticides require more than 25 grams.

Klerat is available in pellet and wax block form. Klerat pellet is recommended for indoor use, while Klerat wax block is best for outdoor as it can stand wet and moisture.

For more information on rodent control and Klerat, you may call Jardine Distribution, Inc. at 02-8436011-19, 0920-9102629, email at cs@jardinedistribution.com.
